

■ GET THE CARE YOU NEED WITH PROGRAMS DESIGNED TO WORK IN CONJUNCTION WITH OUR MEDICAL PLANS

Learn about all these programs and more by visiting Conner Strong & Buckelew's BenePortal at www.csbbeneportal.com

Regenexx

Non-Surgical Treatment Options

Regenexx is available to members enrolled in a Conner Strong & Buckelew medical/prescription drug plan.

Regenexx provides patients with an alternative to orthopedic surgery by harnessing their body's own healing processes to treat orthopedic injuries including: osteoarthritis, joint injuries, spine pain, overuse conditions, and common sports injuries. Regenexx's proprietary, research based methods and patented protocol allow their doctors to concentrate your cells and apply them precisely to your injured area. Regenerative medicine provides many advantages over traditional surgeries—including faster recovery time, reduced risk, and lower cost.

Regenexx is covered as an in-network benefit within the Conner Strong & Buckelew medical/prescription drug plans. Charges depend on your specific plan details and your deductible and out-of-pocket status at time of service.

To learn more about Regenexx, call **866.671.3099** to speak with Conner Strong & Buckelew's dedicated patient liaison or scan the QR Code.
